

*2005 Hilux shown with all 3 bars level.

The RTRL adapter is the answer to attaching a guttermount leg to all Rhino track mount systems.

Made from stainless steel, the RTRL offers you a flexible and universal mounting system to suit all Rhino tracks. The RTRL lets you level all 3 bars on a vehicle fitted with a canopy by utilising the different heights available in our existing guttermount leg range and mounting them into tracks on the vehicle cabin.

Part# RTRL

*It is recommended that your load not be secured rigidly to all 3 bars because of vehicle flex between cab and tray.
